The exhibition this year will be necess rily of the same character as that of last year, but will be larger than ever before, and

will contain specimens of the latest improve-ments in all the lines represented. Applica-

ally valuable and useful, and there is every promise that this exposition

will be a brilliant success. All the arrangements for opening are in a forward state and

everything or nearly so, will be in place on Wednesday night. There will be no cere-mony—the doors will be thrown open to the

public at the appointed time and the exposi-tion of 1884 will be in full blast.

LITTLE JOHNNY'S PERIL.

Carried Off a Five-Story Building by a Kite. New York, Sept 2 - Johnny McIntover,

years of age, went on the roof of his father's noise, in Hester street, Sunday, to fly his

feet, suspending him fully sixty-five feet above the pavement. The lad swung against

a telephone wire about on a level with the top of the building, when, loosing his hold upon his spool of string, he grasped the

wire and hung directly above the street. There was great excitement in the street,

when Frank Newman, a lad of 14, darted up the stairway and went upon the roof. He made his way to the edge, and, leaning over, caught young McIntover by his cont

collar and, lifting him off the wire, swung him to a place of safety.

War on a Small Scale Carried on for a Few Hours-Many Shots Fired but Only One Man Killed.

Bloodshed.

Columbus, Ohio, Sept. 2.-Early Sunday morning 3,000 miners, representing the entire Hocking valley district, attacked the guards at the Snake hollow mines, killing one and wounding two. The miners had previously cut the telegraph wires to prevent the sheriffs for calling on the governor for help. During the battle which ensued the hoppers were found to be on fire. The miner had blackened their faces before making the attack. They quietly surroundes the guards and opened fire without provoca-tion. The battle which ensued lasted for an hour. It was not known whether any of the miners were hurt. At Nelsonville the mines were surrounded and the hoppers burned before the guards were aware of any ously been cut. The name of the man killed at Snake hollow was William Hare. The two men wounded were shot in the leg and head respectively.

Great excitement prevails throughout the Hocking valley. Only energetic measures can prevent the great destruction of property and heavy loss of life. The striking miners are desperate, and are determined to drive out or kill every imported laborer in the coal

It is now reported that there have been no lawless demonstrations in the Hocking val-ley since midnight Sunday. The wires are down, however, and it is impossible to get reliable information. Governor Hoadly has gone to the scene of the disturbances to investigate the matter for himself. Several militia companies are being held here for further orders. Sanday night the governor reeived a telegram from the sheriff of Hocking county, stating that he was powerless to re-press the disorder and protect life and property, and urging that troops be dispatched forthwith. The Lancaster company, which was stationed twenty miles from Logan, was sent to the place, and is now on guard at the jail. There is no communication with points below Logan, except as carriers reach southern points and send to the city by circuitous routes. This does not enable the authorities to know what is going on till two or three hours' time has pension of mining at an unusually late elapsed, and it is believed that riot has prevailed for hours at certain places. The bank bosses at New Straitsville report that no men are to be found in that town, and the women refuse to tell their whereabouts. They are believed to be out in the riot according to a general and preconcerted plan. Advices are meager and unsatisfactory.

Locan, Ohio, Sept. 2.—Everything is quiet in the valley, and there is no authentic report of damage to person or property Sunday and the content of the valley and the september of damage to person or property Sunday that an adjournment will be effected angelt. There was a rumor that fifteen men inght. There was a runnor that fifteen men by Thursday. There will be no contest over that been killed at Buchtel, but it had been killed at Buchtel, but it he election of officers. T. V. Powderly will be re-elected grand master workman, and is nothing in the report. Telegraph commission for the farmer of this city, secretary, at a saling that continued firing occurred a large one, as many of the distant assemblies early in the evening between the strikers and guards at Sand Ran and Longstreth. It is not heaven as that are presentation have agreed to stand by the action of the convention. It is not learned yet that any person was in-

jured.

Governor Hondly arrived here on a special train early in the morning, and is dispseed to learn all he can about the situation Conville, Walter Crafts, of the Hocking coal company; Frank Merrick, attorney for the latter company, and correspondents. The governor held a consultation with the leading citizens of Logan, among them being Judge Friener, Col. Weldy, the sheriff, and others He says he has formed no definite conclusion as yet from the talks he has had, but will make a circuit of the mines and try and see the leaders on both sides. He will be accompanied by the sheriff, Judge Friesner, and

Frank Woody is in jail here, having been arrested for participating in the riot Saturday night and for sheeting William O'Hara, one of the guards. He has made a full confession, in which he gave the names of five or six of the leaders in the attack of Saturday night. Sheriff McCarthy will furnish the names of all implicated as soon as arrests can be made. The presence of the militis about the juil seems to have had the effort of making Woody weaken. When cuptured his but was found shot full of holes.

William (Flara, the guard killed, was an old) veteran of the war. When attacked by the strikers he was heard to cry: "For God's sake, men, have mercy!" but instantly fell, pierced with forty shot. Until recently thirty-five of Pinkerton's men guarded Smake hollow, but they were transferred and replaced by twenty-two civilians, sworn in and armed with a breech-loading shot-gun and a brace of revolvers each.

Talking to the Strikers. New Straffsville, Ohio, Sept. 2.—Judge Friesner, of Logan, who is in consultation with Governor Hondly, thinks the worst of

the trouble in the valley over. The governo

says Friesner is charged with a great deal of

responsibility and considers his opinion of outsierable force. The governor left to gain at 1930 for a trip to the principal mining towns, ace equalist by Sheriff McCarthy and several others. Before leaving he telegraphed all points he wanted to meet the promine : miners and bear their side of the story. A all stations a large number of miners wer a to meet the train and at this thee about 500 had congregated. The greatest interest prevailed, and the greener began the holding of private con a tations with representative miners. The president of this district and others who were questioned deny stoutly that there is any necessity for militia at this point, and claim to know nothing about the burning of th hopper at mine No. 7, a short distance f on here. They have a theory that the guards became dissatisfied with the wages they were getting, and set fire to the hopper themselves. The governor tells them that he doesn't want to be forced to order the military on the ground, and is exacting promises that the miners will do all in their power to aid the civil authorities. If he should conclude, however offer visiting all the points, that the military is required, he says he will have regive orders to that effect. A team was brought out at this place to convey the gov-ernor and a few others to the mine where the hopper was burned, and just as it started three cheers were proposed for the governor. The response was very prove this O. Grotjan will guarn weak and without enthusiasm. Some tee it to all. Price 50 cents and \$1 of the miners are very glum, and say this trip is only a political scheme. Several of the miners interviewed say there is no polities in the situation, and that the topic is scarcely mentioned in the valley. The gov-

ernor expects to visit other points. THE CHICAGO EXPOSITION.

Preparations for It Rapidly Approaching Completion-A Great Exhibition Promised.

Chicago, Sept 2.—An army of mechanics of ell sorts is bustly engaged in preparing the exposition bailding for the twelfth annual exhibition which will open Wednesday. Sid inst., at 8 p. m. A number of improvements have been made in the building itself. It has been repainted with fire-proof paint, and now looks fresh, clean and neat. A new elevator of iron has been put into replace the old one, and has been placed at the south end of the building instead of the north end, and of the building instead of the north end, and has been placed at the south end of the building instead of the north end, and see advertisement in this paper. ---- are numerous other improvements.

Glancing Calmly Over the Field.

My son, this is a glorious country, and this is the golden age of the world, and the purchasing power of a dollar is one hundred cents, and a copper cent in New England is tossed about as recktions for space have reached the limit of the ability of the managers to provide, and still Colorado. In this golden age and in this glorious republic, there lived and nothing exhibited, except what is rethere still lives a man. He was tall and comely; his stature was the stature of a man. He stood well in society. He was honest and trustworthy. His name was good at the bank; his indorsement of a note turned that note into gold. He was educated, talented, public-spirited. People came to him for advice. Peopie, irrespective of age, rank, sex, previous condition of servitude, color or politics, bowed to him, accosted him with profound respect, invited him to their homes, were honored and so ex-pressed themselves, if he accepted, and they esteemed it a yet greater honor to be invited to his house. Everybody called him "Mister." Even his enemies, for such a man always has enerealize that he was approaching the edge of the roof, so intently was the little fellow watching his huge toy. Suddenly a strong gust of wind enught the kite and literally lifted him from his honesty, his high standing as a citizen

and a member of refined society was established beyond a shadow of doubt. One day he was cominated for President of the United States.

The next morning he was in the mouths of nearly twenty millions of peo-

100,000 **ANGRY HOUSEKEEPERS**

Wish to know why the Royal Baking Powder Company with-hold from the Public the simple intelligence that their Powder contains AMMONIA.

Eminent Physicians and Druggists

Ammonia is a Dangerous Drug

in any human diet. Its use in food is an offense to nature.

Tartrate of Lime is found in all Cream of Tartar. It is a natural product, of vegetable origin, derived from the wines which produce Cream of Tartar. It is a constituent of the grape as well as other fruits.

The idea that Tartrate of Lime can be converted into lime at the temperature of the oven is the rankest nonsense, and could only originate in the brain of one totally devoid of chemical knowledge. The "Royal" contains it. It has no injurious action-upon the system.

The crying of "Lime" in the way the Royal Baking Pow-der Company do is another trick to extricate themselves from the use of the powerful drug Ammonia in their powder.

Do not Take our Word for it.

Every housekeeper can prove the truth of our statements by placing a can of the "Royal", top down, on a hot stove, un-Machiavelian jockey.

And a self-worshiped, debased, ignotil heated, then remove the cover and smell "AMMONIA"; this
rant, weak, ambitious, unscrupulous
test will show that the "Royal" contains AMMONIA; that Dr. Price's Cream Baking Powder does not contain Ammonia. The strength of our powder can be proven by the consumer's

THE TEST OF THE OVEN

Dr. Price's Cream Baking Powder is superior to the "Roy-It contains no Ammonia. The "Royal" contains Ammon-The use of Ammonia in articles of food I believe to be injurious.—**ELIAS H. BARTLEY**, B. S., M. D., Chemist of the Department of Health, Brooklyn (N. Y.), May 20, 1884.
